1 Affiliation and Research Experience

Current Affiliation

1. **Concordia University**, Montreal, Canada January 2007 – Present
Department of Geography, Planning and Environment
 - Concordia University Research Chair in Science and Sustainability (June 2012 – Present)
 - Professor (June 2016 – Present)
 - Associate Professor (June 2010 – May 2016)
 - Graduate Program Director (2011 – 2013)
 - University Research Fellow (2009 / 2010)
 - Assistant Professor (January 2007 – May 2010)

Post-doctoral Research Experience

1. **Carnegie Institution**, Stanford, California September – December 2006
 - Postdoctoral Researcher, Department of Global Ecology
 - Supervisor: Dr. Ken Caldeira
2. **University of Calgary**, Calgary, Canada October 2004 – September 2006
 - Postdoctoral Fellow, Department of Geography
 - Supervisor: Dr. Shawn Marshall

2 Educational History

1. **University of Victoria**, Victoria, Canada September 2000 – August 2004
 - Doctor of Philosophy in Earth and Ocean Sciences (Climate Science)
 - Date Awarded: November 2004
 - PhD Dissertation Title: *Land Cover Change, Vegetation Dynamics and the Global Carbon Cycle: Experiments with the UVic Earth System Climate Model*
 - Supervisor: Dr. Andrew Weaver
2. **Simon Fraser University**, Vancouver, Canada September 1994 – April 1999
 - Undergraduate Honours Degree in Environmental Sciences (Quantitative Methods)
 - Date Awarded: October 1999

3 Scholarly and Professional Contributions

Most Significant Contributions to Research

- 1. Climate response to cumulative emissions:** We introduced the idea of measuring global climate warming as a function of cumulative emissions of carbon dioxide in 2009 in *Nature* (Matthews et al. 2009). Our finding of a linear relationship between cumulative carbon emissions and global temperature change has proven to be a simple, yet powerful method to estimate the allowable global carbon budgets for climate mitigation targets (Matthews et al. 2012, Matthews and Zickfeld 2012). In Leduc et al. (2016), we extended this analysis to the regional scale, showing that regional temperatures also respond linearly to cumulative carbon emissions. These ideas formed a central theme of the U.S. National Academy of Sciences Climate Stabilization Targets report (Solomon et al. 2011), and were highlighted in the IPCC’s Fifth Assessment Report (Collins et al. 2013).
- 2. Identifying national contributions to and responsibility for global warming:** In Matthews et al. (2014), we presented a new calculation of individual country contributions to historical climate change. This study is of considerable relevance to current international negotiations aimed at determining historical responsibility for climate warming as a criteria for setting future emissions allowances, and since publication, has been downloaded more than 30,000 times. In Matthews (2016), I presented a new analysis of the substantial disparity among countries with respect to their historical climate contributions, and showed that this inequality could be quantified as a “climate debt” owed by those countries who have over-contributed to historical warming.
- 3. Rethinking avoidable and irreversible climate warming:** In 2008 we introduced the idea that eliminating human CO₂ emissions would lead to stable temperatures which persist for many centuries, challenging the standard concept of continued climate warming from past emissions as a result of climate inertia. Instead, as we argued in Matthews and Weaver (2010), Davis et al. (2010) and Matthews and Solomon (2013), future warming is a unique function of future (rather than past) emissions, which has important implications for the perceived potential of climate mitigation.
- 4. Effect of climate change on outdoor skating and hockey in Canada:** In Damyanov et al. (2012), we presented the first scientific study of how recently-observed winter temperature increases in Canada have affected the outdoor skating season. We found that winter climate warming has already led to a significant shortening of the season conducive to the creation and maintenance of outdoor rinks. This study was cited by the NHL’s 2014 Sustainability Report, in which they highlighted the potential threat of climate change to professional hockey.
- 5. Simulating and critiquing the climate response to geoengineering:** In a series of publications between 2007 and 2009 we assessed the implications of geoengineered climate stabilization, highlighting critical risks and uncertainties, and offering a novel critique of geoengineering, drawing analogy to a range of other human interventions in ecological systems.

Publications in Refereed Journals

*Student author's names are indicated below in **bold**.*

PUBLICATIONS AND CITATIONS SUMMARY

- **Number of refereed publications:** 90
- **Total Citations:** 13732
- **h-index:** 32

Presentations, Seminars and Workshops

INVITED PRESENTATIONS AND SEMINARS

1. **Global warming and the 2-degree target**
 - Invited Speaker, Moving the Shakers youth climate change event, January 2017.
2. **After the Paris talks: matching emissions targets to ambitious climate goals**
 - Invited Speaker, Divest Concordia Conference, October 2016.
 - Invited Speaker, St. James Literaty Society, Montreal, September 2016.
 - Invited Speaker, Dawson College Social Science Week, Montreal, February 2016.
3. **Science en support d'un budget carbone pour la Ville de Montreal**
 - Invited Speaker, City of Montreal carbon budget meeting; May 2016.
4. **Au-Delà de COP21: défis et opportunités d'une cible de 1,5 degrés**
 - Invited Speaker, Development and Peace, Montreal, March 2016.
5. **Countdown to 2°C**
 - Invited Speaker, Climate Clock projection launch, April 2016.
 - Invited Speaker, Montreal Summit on Innovation, Montreal, November 2015.
6. **2 degrees of climate change**
 - Invited Speaker, Eco-Quartier NDG, Montreal, November 2015.
7. **Cumulative emissions, climate debts and the 2°C target**
 - Invited Seminar, Dawson College, Montreal, November 2015.
8. **Cumulative emissions, climate debts and the 2°C target**
 - Invited Seminar, Department of Geography, Planning and Environment, Concordia University, September 2015.
9. **Concordia climate lab research update**
 - Invited Presentation, UVic ESCM Developers Workshop, Victoria, May 2015.
10. **Climate change and sustainability Science**
 - Invited Presentation, Americana Conference, Montreal, March 2015.
11. **The responsibility of nations: historical contributions to observed warming**
 - Invited Speaker, NCSE Energy and Climate Change Conference, Washington DC, January 2015.
12. **Quantifying historical climate debts among nations**
 - Invited Presentation, American Geophysical Union Fall Meeting, San Francisco, December 2014.
13. **Cumulative carbon budgets for climate mitigation targets**
 - Invited Presentation, International Workshop on Risk Information for Climate Change, Yokohama, Japan, November 2014.

14. **Global warming: Hope or Despair?**
 - Invited Speaker, “Walrus Talks Climate,” Ottawa, April 2014.
15. **National contributions to observed global warming**
 - Invited Seminar, Ouranos Research Consortium, Montreal, April 2014.
16. **Cumulative carbon as a new framework for climate mitigation**
 - Invited Seminar, MIT Department of Earth and Planetary Sciences, March 2013.
 - Invited Seminar, Center for Global Change Science, U. Toronto, February 2013.
17. **Global warming in the new millennium**
 - Keynote Speaker, Concordia-Siena Globalization Conference, Montreal, March 2012.
 - Ouranos Consortium, Montreal, June 2011.
18. **Global climate changes and impacts from ongoing greenhouse gas emissions**
 - Managing Climate Change Risks for Pension Investment Funds, Montreal, October 2011.
19. **The oceans and committed climate warming**
 - National Conference on Science, Policy, and the Environment, Wash. DC, January 2011.
20. **Cumulative carbon and the climate mitigation challenge**
 - Department of Biology, Concordia University, February 2011.
 - Department of Geography, University of Montreal, January 2011.
 - Institute for Sustainable Energy, Environment and Economy, University of Calgary, November 2010.
 - Department of Earth and Planetary Sciences, McGill University, October 2010.
21. **Potential for mitigation via CO₂ emissions reductions**
 - Royal Society discussion meeting: “Geoengineering – taking control of our planet’s climate,” London, U.K., November 2010.
22. **Geoengineering**
 - Climate Change Conference 2010, Toronto, ON, August 2010.
23. **Climate change: Science and Solutions.**
 - Marionopolis College Green Week Speaker Series, Montreal, QC, October 2009.
24. **What does it take to stabilize climate? Insights from Earth system models**
 - Department of Geography, McGill University, April 2009.
 - Institute for Atmospheric and Climate Science, ETH Zurich, March 2009.
 - Department of Geography, University of Toronto, November 2008.
25. **Solving the climate problem**
 - AlumNights Panel Series, Montreal, Quebec, November 2008.
26. **Quantifying carbon sinks and feedbacks to climate using Earth system models**
 - CIFAR Oceans Nitrogen Workshop, Toronto, Ontario, November 2008.
27. **Solving the climate problem**

- AlumNights Panel Series, Montreal, Quebec, November 2008.
28. **What does it take to stabilize climate?**
 - Cutting Edge Lectures, McGill University, October 2008.
 29. **Carbon-cycle feedbacks increase the likelihood of a warmer future**
 - 10th International Workshop on Next Generation Climate Models for Advanced High Performance Computing Facilities, Waikiki, Hawaii, February 2008.
 30. **Climate change: Science and solutions**
 - Department of Geography, Planning and Environment Seminar Series, Concordia University, Montreal, QC, March 2008.
 - Montreal Inter-University Seminar on the History and Philosophy of Science, Montreal, QC, November 2007.
 31. **Transient climate-carbon simulations of planetary geoengineering**
 - American Geophysical Union 2007 Fall Meeting, San Francisco, CA, December 2007.
 - NASA/AMES Workshop on Managing Solar Radiation, Moffet Field, CA, November 2006.
 32. **Geoengineering**
 - Earth and Environmental Systems Institute Seminar Series, Penn State University, University Park, PA, November 2007.
 33. **Coupled climate-carbon cycle simulations using the UVic ESCM**
 - Coupled Climate Carbon Cycle Model Intercomparison Project (C⁴MIP) Workshop, Exeter, U.K., October, 2006.
 34. **Coupling climate and the carbon cycle: Implications for future climate change.**
 - Geosciences Department, Penn State University, University Park, PA, September 2006.
 - College of Oceanic and Atmospheric Sciences, Oregon State U., Corvallis, OR, April 2006.
 - Department of Global Ecology, Carnegie Institution, Stanford, CA, March 2006.
 - Department of Geography, Planning and Environment, Concordia University, Montreal, QC, February 2006.
 35. **Modeling terrestrial carbon cycle dynamics and feedbacks to climate.**
 - Department of Atm. and Oceanic Sciences, McGill University, Montreal, QC, April 2005.
 36. **The terrestrial carbon cycle and the role of historical land cover change in the UVic Earth System Climate Model.**
 - American Geophysical Union/Canadian Geophysical Union 2004 Joint Assembly, Montreal, QC, May 2004.

ORAL CONFERENCE PRESENTATIONS AND SEMINARS

1. **Carbon budget estimates for the 1.5 degree target**
 - 1.5 Degrees: Meeting the challenges of the Paris Agreement, Oxford, September 2016.
2. **Impact of future climate change on non-human primate species**
 - Annual Meeting of the International Primatological Society, Chicago, August 2016.

3. **Allocating a 2C carbon budget to nations**
 - American Geophysical Union Fall Meeting, San Francisco, December 2014.
4. **National climate footprints: country contributions to observed global warming**
 - Canadian Meteorology and Oceanography Society Meeting, Saskatoon, SK, June 2013.
5. **Identifying regional vulnerabilities of primate populations to continued global warming**
 - International Primatology Society Meetings, Cancun, Mexico, August 2012.
6. **Climate response to cumulative greenhouse gas and aerosol emissions**
 - Canadian Meteorology and Oceanography Society Meeting, Montreal, QC, June 2012.
7. **Cumulative carbon as a policy framework for achieving climate stabilization**
 - Canadian Meteorology and Oceanography Society Meeting, Victoria, BC, June 2011.
 - European Geophysical Union Annual General Assembly, Vienna, Austria, April 2011.
8. **Impacts of climate change on non-human primates**
 - International Primatology Society Meetings, Kyoto, Japan, September 2010
9. **Cumulative carbon emissions and committed climate warming**
 - CMOS-CGU Joint Assembly, Ottawa, ON, June 2010.
10. **Climate-carbon sensitivity: a new measure of the climate response to carbon emission**
 - IAMAS-IAPSO-IACS Joint Assembly, Montreal, QC, July 2009.
11. **Sensitivity of ocean acidification to geoengineered climate stabilization**
 - IARU International Climate Change Congress, Copenhagen, Denmark, March 2009.
12. **Stabilizing climate requires near-zero emissions**
 - European Geophysical Union Annual General Assembly, Vienna, Austria, April 2008.
13. **Coupling climate and the carbon cycle: Implications for future climate change.**
 - Department of Atmospheric Physics, Oxford University, Oxford, U.K., March 2006
 - Hadley Centre for Climate Prediction and Research, Exeter, U.K., March 2006.
 - Dialogues in Geography Series, University of Calgary, Calgary, AB, November 2005.
14. **Modeling terrestrial carbon cycle dynamics and feedbacks to climate.**
 - Topics in Atmospheric and Oceanic Sciences Seminar Series, Canadian Centre for Climate Modelling and Analysis, Victoria, B.C., May 2005.
 - Frontier Research Centre for Global Change, Yokohama, Japan, May 2005.
15. **Primary productivity control of simulated carbon cycle-climate feedbacks.**
 - European Geophysical Union Annual General Assembly, Vienna, Austria, April 2005.
16. **Simulating carbon-cycle feedbacks with the UVic Earth System Climate Model.**
 - Coupled Climate Carbon Cycle Model Intercomparison Project (C⁴MIP) Workshop, Berkeley, CA, December 2004.

17. **Terrestrial carbon cycle dynamics under recent and future climate change.**
 - Climate Variability and Predictability Workshop, Victoria, BC, February 2004.

RECENT POSTER PRESENTATIONS

1. **Allocating a 2°C carbon budget to countries**
 - Poster Presentation, American Geophysical Union Fall Meeting, San Francisco, December 2014.
2. **Climate response to cumulative emissions of greenhouse gases and aerosols**
 - Planet Under Pressure (PLAN) Conference, London, England, March 2012.
3. **Climate response to carbon emissions**
 - IARU International Climate Change Congress, Copenhagen, Denmark, March 2009.
4. **Climate commitment and the 2 degree temperature target**
 - American Geophysical Union 2008 Fall Meeting, San Fransisco, CA, December 2008.
5. **Transient climate-carbon simulations of planetary geoengineering**
 - European Geophysical Union Annual General Assembly, Vienna, Austria, April 2008.
6. **Climate sensitivity to carbon emissions**
 - American Geophysical Union 2007 Fall Meeting, San Fransisco, CA, December 2007.
7. **Carbon cycle feedbacks increase the likelihood of a warmer future**
 - American Geophysical Union 2006 Fall Meeting, San Fransisco, CA, December 2006.

4 Grants, Scholarships, Awards and Honours Received

Research Grants Received

1. **Horizon Postdoctoral Fellowship Grant**
 - *Granting Agency:* Concordia University
 - *Title:* Quantifying carbon budgets for ambitious mitigation targets
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$76,000 *Period Held:* 2017-2019.
2. **Research Contract**
 - *Granting Agency:* Ouranos Research Consortium
 - *Title:* A new framework for using climate scenario data for impacts and assessment studies
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$25,000 *Period Held:* 2015-2016.
3. **Research Contract**
 - *Granting Agency:* Ouranos Research Consortium
 - *Title:* Un test d'évaluation des performances conçu pour un protocole avancé de prise de décisions

- *Principle Investigator:* H. Damon Matthews and Ketra Schmitt
 - *Value:* \$55,000 *Period Held:* 2015-2016.
4. **Research Chair in Climate Science and Sustainability**
 - *Granting Agency:* Concordia University
 - *Title:* Achieving climate stabilization: the challenge of climate mitigation
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$75,000 *Period Held:* 2012-2016.
 5. **NSERC Discovery Grant**
 - *Granting Agency:* Natural Sciences and Engineering Research Council of Canada
 - *Title:* Quantifying the climate response to cumulative greenhouse gas emissions
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$230,000 (\$46,000 / year) *Period Held:* 2012-2016.
 6. **NSERC Accelerator Supplement**
 - *Granting Agency:* Natural Sciences and Engineering Research Council of Canada
 - *Title:* Quantifying the climate response to cumulative greenhouse gas emissions
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$120,000 *Period Held:* 2012-2014.
 7. **Collaborative Research and Training Experience (CREATE)** (co-applicant)
 - *Title:* NSERC CREATE Research and Training via an Institute in Water, Energy and Sustainability
 - *Principle Investigator:* Catherine Mulligan (Concordia)
 - *Value:* \$1,650,000 (10%) *Period Held:* 2012-2017.
 8. **CFCAS Project Supplement**
 - *Granting Agency:* Canadian Foundation for Climate and Atmospheric Sciences
 - *Title:* Climate and carbon cycle implications of future land management in Canada
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$20,000; *Period Held:* 2012
 9. **FQRNT Regroupement Strategique** (co-applicant)
 - *Granting Agency:* Fonds Québécois de la Recherche sur la Nature et les Technologies
 - *Title:* Global Environmental and Climate Change Center (GEC3)
 - *Principle Investigator:* Gail Chmura (McGill)
 - *Value:* \$300,000 (5%); *Period Held:* 2011-2012
 10. **CFCAS Project Grant**
 - *Granting Agency:* Canadian Foundation for Climate and Atmospheric Sciences
 - *Title:* Probabilistic forecasts of the viability of future Canadian carbon sinks
 - *Principle Investigator:* H. Damon Matthews
 - *Value:* \$190,780; *Period Held:* 2008-2009
 11. **NSERC Discovery Grant**
 - *Granting Agency:* Natural Sciences and Engineering Research Council of Canada
 - *Title:* Quantifying uncertainties in future carbon cycle feedbacks

- *Principle Investigator:* H. Damon Matthews
- *Value:* \$110,000; *Period Held:* 2007-2011

12. FQRNT Nouveaux Chercheurs

- *Granting Agency:* Fonds Québécois de la Recherche sur la Nature et les Technologies
- *Title:* Probabilistic assessment of future terrestrial carbon cycle and climate changes
- *Principle Investigator:* H. Damon Matthews
- *Value:* \$75,000; *Period Held:* 2007-2008

Awards and Honours Received

1. Induction to the College of New Scholars, Artists and Scientists

- *Awarded By:* Royal Society of Canada
- *Date Awarded:* November 2016

2. Newsmaker of the Week

- *Awarded By:* Concordia University
- *Date Awarded:* August 2016, April 2016, January 2016, September 2015, January 2014, November 2012, March 2012

3. CMOS President's Prize

- *Awarded By:* Canadian Meteorological and Oceanography Society
- *Category:* Prize awarded for a recent paper of special merit
- *Date Awarded:* June 2015

4. IAP Young Scientist Representative at World Science Forum

- *Awarded By:* The InterAcademy Partnership
- *Description:* One of four Canadian young scientists selected
- *Date Awarded:* May 2015

5. Canada Clean50 2015 Honouree

- *Granting Agency:* Delta Management Group
- *Category:* Education and Research
- *Date Awarded:* September 2014
- *URL:* www.clean50.com

6. President's Media Outreach Award – International

- *Awarded By:* Concordia University
- *Date Awarded:* June 2014

7. Dean's New Scholar Award

- *Awarded By:* Faculty of Arts and Science, Concordia University
- *Value:* \$500; *Period Held:* 2009

8. Concordia University Research Fellow

- *Award:* University Research Award
- *Category:* 'Technology, Industry and Environment' Emerging Category
- *Value:* \$5,000; *Period Held:* 2009

9. Post-Doctoral Research Fellowships

- *Awarded by:* Alberta Ingenuity Fund (\$44,000)
- *Awarded by:* Natural Sciences and Engineering Research Council of Canada (\$80,000)

5 Training of High Quality Personnel

5.1 Summary of Current and Past Supervision

	Current		Completed		Total
	Supervised	Co-supervised	Supervised	Co-supervised	
Honours students	1		5	1	7
Masters students	4		7	4	15
Ph.D. students	2	1		1	4
Post-docs	1	2	2	1	6
Total	8	3	14	7	32

5.2 Current Graduate Students and Post-docs

1. Nadine Mengis (Post-doctoral researcher)
 - *Topic:* Carbon budgets for ambitious climate mitigation targets.
2. Yann Chavaillaz (Post-doctoral researcher)
 - Co-supervised with Philippe Roy (Ouranos)
 - *Topic:* Extreme weather and abrupt climate events.
3. Antti-Ilari Partanen (Post-doctoral researcher)
 - Co-supervised with Martin Leduc (Ouranos)
 - *Topic:* Climate and health effects of aerosol mitigation scenarios.
4. Daniel Horen Greenford (Ph.D. Student)
 - *Topic:* Climate responsibility and ethics.
5. Travis Moore (Ph.D. Student)
 - *Topic:* Observed and future extreme weather changes
6. Marc-Olivier Brault (Ph.D. Student, McGill University)
 - Co-supervised with Lawrence Mysak (McGill)
 - *Topic:* Effect of terrestrial weathering on long-term climate and carbon cycle changes.
7. Étienne Guertin
 - *Topic:* Modelling fire as a climate disturbance.
8. Maida Hadziosmanovic
 - *Topic:* Assessing corporate responsibility for climate change.
9. Tanya Graham (M.Sc. Student)
 - *Topic:* Quantifying mammalian vulnerability to global climate changes.

10. Caroline-Sophie Gauvreau (M.Sc. Student)
 - Co-supervised with David Greene
 - *Topic:* Impact of climate change on plant phenology.
11. Samantha Maillot (Honours Student)
 - *Topic:* Effect of the Climate Clock on public perception of global warming.

5.3 Completed Graduate Students and Post-docs

1. Jean Sébastien Landry (Post-doctoral researcher)
 - *Topic:* Modelling disturbances in the climate system.
2. Christopher Simmons (Post-doctoral researcher)
 - *Topic:* Deglacial climate changes, terrestrial carbon cycling and human land-use change.
 - *Poster:* American Geophysical Union, San Francisco, December 2014
3. Martin Leduc (Post-doctoral researcher)
 - *Topic:* Assessing uncertainties and limits associated with the climate response to cumulative greenhouse gas emissions.
 - *Presentation:* Ouranos Research Seminar, Montreal, April 2014
 - *Invited presentation:* Canadian Meteorological and Oceanographic Society, Whistler, BC, June 2014
 - *Poster:* American Geophysical Union, San Francisco, December 2014
4. Christopher Simmons (Ph.D. Dissertation, McGill University): Completed October 2013.
 - Co-supervised with Lawrence Mysak
 - *Topic:* Carbon cycle dynamics since the last glacial maximum.
 - *Presentation:* European Geophysical Union, Vienna, April 2013.
 - *Poster:* American Geophysical Union, San Francisco, December 2013.
5. Loukia Papadopoulos (M.Sc. Thesis): Completed January 2017
 - *Topic:* Nationally Appropriate Mitigation Strategies.
6. Trevor Smith (M.Sc. Thesis): Completed January 2017
 - *Topic:* Impacts of climate change on Quebec viticulture.
7. Daniel Horen Greenford (M.Sc. Thesis): Completed September 2016
 - *Topic:* Historical national contributions from a range of greenhouse gases and aerosols.
8. Cassandra Lamontagne (M.Sc. Thesis): Completed April 2016
 - Co-supervised with Monica Mulrennan
 - *Topic:* Impacts of climate change on a coastal First Nations community.
9. Travis Moore (M.Sc. Thesis): Completed September 2013
 - *Topic:* Quantifying extreme weather events as a function of global mean temperature change.
10. Marc-Olivier Brault (M.Sc. Thesis, McGill University): Completed August 2012.

- Co-supervised with Lawrence Mysak
 - *Topic:* Effect of Pleistocene megafauna on early Holocene climate.
 - *Presentation:* CMOS Assembly, Montreal, QC, May 2012.
 - *Poster:* American Geophysical Union, San Francisco, December 2012.
11. Nikolay Damyanov (M.Sc. Thesis, McGill University): Completed August 2011.
 - Co-supervised with Lawrence Mysak
 - *Topic:* Effect of winter warming on outdoor skating in Canada.
 - *Presentation:* CMOS Assembly, Victoria, BC, June 2011.
 12. Andrew Pinsonneault (M.Sc. Thesis): Completed August 2011.
 - *Topic:* Effect of ocean acidification on the marine carbonate cycle.
 - *Presentation:* CMOS Assembly, Victoria, BC, June 2011.
 13. Karen Paquin (M.Sc. Thesis): Completed April 2011.
 - Co-supervised with Jochen Jaeger
 - *Topic:* Potential for carbon sequestration in boreal forest woodlots.
 14. Andrew Ross (M.Sc. Thesis): Completed July, 2010.
 - *Title:* Probabilistic assessment of the rate of future climate change.
 - *Poster:* CMOS-CGU Joint Assembly, Montreal, QC, June 2010.
 15. Alex Matveev (M.Sc. Thesis): Completed August, 2009.
 - *Title:* Evaluating the land use change carbon flux and its impact on climate.
 - *Poster:* European Geophysical Society General Assembly, Vienna, April 2009.
 - *Poster:* IAMAS-IAPSO-IACS Joint Assembly, Montreal, QC, July 2009.
 16. Tanya Graham (Honours Thesis): Completed April 2013
 - Co-supervised with Sarah Turner
 - *Topic:* Impact of climate change on primate populations.
 - *Presentation:* AFCAS conference, Montreal, May 2014
 - *Presentation:* Ouranos Research Seminar, Montreal, April 2014.
 17. Trevor Smith (Honours Thesis): Complete April 2012
 - *Topic:* Metrics for comparing the climate effect of different greenhouse gases.
 - *Poster:* CMOS Assembly, Montreal, QC, May 2012.
 18. Serge Keverian (Honours Thesis): Completed April 2011
 - *Topic:* Regional attribution of carbon emissions and climate change.
 19. Kelly Nugent (Honours Thesis): Completed April, 2010.
 - *Topic:* Drivers of North American continental runoff and implications for ocean circulation.
 - *Poster:* CMOS-CGU Joint Assembly, Montreal, QC, June 2010.
 20. Andrew Pinsonneault (Honours Thesis): Completed April, 2009.
 - *Title:* Climate model reliability in simulating enhanced forest productivity resulting from CO₂ fertilization.

- *Poster*: IAMAS-IAPSO-IACS Joint Assembly, Montreal, QC, July 2009.
21. Andrew Ross (Honours Thesis): Completed April, 2008.
- *Title*: Impact of geoengineering on the rate of climate warming.
 - *Poster*: American Geophysical Union Fall Meeting, San Francisco, December 2008

6 Teaching

a. Courses Taught

1. **Geography 478: Climate Change—Science, Impacts and Policy**
 - Department of Geography, Planning and Environment, Concordia University.
 - Upper-level (fourth-year) undergraduate course (18 - 27 students), Winter 2008; Fall 2009; Winter 2011; Winter 2016; Winter 2017.
 - *Topics Covered*: The climate system; Greenhouse effect; Carbon cycle; Past climate change; Climate modeling and predicting future climate change; Climate impacts; International climate policy; Energy alternatives.
2. **Human Environment 660: Climate change and sustainability**
 - Department of Geography, Planning and Environment, Concordia University.
 - Graduate-level course (20 students), Fall 2015.
 - *Topics Covered*: Science of climate change; climate modelling; climate data analysis and visualization; climate mitigation strategies; burden sharing and equity; human responses to climate change; Matlab programming.
3. **Human Environment 665Q: Quantitative Research Methods**
 - Department of Geography, Planning and Environment, Concordia University.
 - Graduate-level course (13 students), Fall 2012.
 - *Topics Covered*: Experimental design and quantitative analysis; basic statistical tests; linear and multiple linear regression; analysis of variance; mixed effect models; R programming.
4. **Geology 440: Current Research in Environmental Earth Sciences**
 - Department of Geography, Planning and Environment, Concordia University.
 - Upper-level (fourth-year) undergraduate course (20 students), Fall 2011.
 - *Topics Covered*: Paleoclimate; climate change; water resources; air quality and health; energy resources; life and ecosystems.
5. **Human Environment 615: Research Group Seminar**
 - Department of Geography, Planning and Environment, Concordia University.
 - Graduate-level course (6-12 students), Winter 2009; Fall/Winter 2015.
 - *Topics Covered*: Literature review; Development and framing of research questions; Presentation of proposed research; Poster presentation techniques; Public event organization.
6. **Human Environment 655: Environmental Modeling**
 - Department of Geography, Planning and Environment, Concordia University.

- Graduate-level course (8-14 students), Winter 2008; 2009; 2012.
- *Topics Covered:* Introduction to systems dynamics modeling; Use of computer modeling software; Basic differential equations; Formulation and validation of systems dynamic models; Application of models to environmental and policy problems.

7. Geography 378: The Climate System

- Department of Geography, Planning and Environment, Concordia University.
- Upper-level (third-year) undergraduate course (45-60 students), Fall 2007; 2008.
- *Topics Covered:* Climate system components (Atmosphere, Ocean, Cryosphere, Biosphere, Lithosphere); Today's climate system; Plate tectonics and tectonic-scale climate change; Past greenhouse and icehouse climate; Orbital-scale climate change; Glacial-interglacial cycles; Last-glacial maximum; Holocene; Historical climate changes.

8. Geography 398C: Climate Change—Science, Impacts and Policy

- Department of Geography, Planning and Environment, Concordia University.
- Upper-level (third-year) undergraduate course (35 students), Winter 2007.
- *Topics Covered:* The climate system; Greenhouse effect; Carbon cycle; Past climate change; Climate modeling and predicting future climate change; Climate impacts; International climate policy; Energy alternatives.

9. Geography 305: Introduction to Weather and Climate

- Department of Geography, University of Calgary.
- Introductory (second-year) undergraduate course (100 students), Fall 2005.
- *Topics Covered:* Atmospheric structure; Radiation; Greenhouse effect; Climate change; Seasons; Humidity and stability; Clouds and precipitation; Atmospheric circulation; Mid-latitude cyclones; Thunderstorms, tornadoes and hurricanes; Weather forecasting.

10. Environmental Management 6130: Climate Dynamics and Modeling

- University of the West Indies, Barbados.
- 3-week intensive master's level course (6-7 students), April 2004; January 2005.
- *Topics Covered:* Global energy balance; Atmospheric radiative transfer; Modeling clouds in the climate system; Surface energy balance; Atmospheric boundary layer; Hydrological cycle; Modeling the surface water balance; Climate sensitivity, feedbacks and forcing.

7 Service and Professional Activities

a. Journal Editing

1. **Guest Editor**, Environmental Research Letters Focus Issue: Cumulative Emissions, Global Carbon Budgets and the Implications for Climate Mitigation Targets, November 2014–Present.

b. Conference Session Organization

1. **Session Convenor**, “Historic Emissions and the Question of Responsibility for Climate Change Loss and Damage, Adaptation and Mitigation,” Our Common Future under Climate

Change, Paris, July 2015.

2. **Session Convenor**, “Fossil fuel infrastructure and climate change mitigation: emerging perspectives,” Our Common Future under Climate Change, Paris, July 2015.
3. **Session Convenor**, “From Carbon Emissions to Climate Change,” Canadian Meteorological and Oceanographic Society Congress, June 2015.
4. **Session Convenor**, “Historic Contributions: the Common but Differentiated Responsibility Challenge,” NCSE Energy and Climate Change conference, January 2015.
5. **Session Convenor**, “Connecting Climate Impacts to Cumulative Carbon Emissions and Linking Biophysical Functions to Human Values,” American Geophysical Union Fall Meeting, San Francisco, December 2014.
6. **Session Convenor**, “Climate Change and the Carbon Cycle,” Canadian Meteorological and Oceanographic Society Congress, June 2010, 2011, 2012, 2013.
7. **Session Convenor**, “Climate Change Impacts and Stabilization III: Stabilization Prospects, Trajectories, and Uncertainties,” American Geophysical Union Fall Meeting, December 2008.

c. External Committees and Workshops

1. **Event Organizer** Climate Clock Projection Launch on Earth Day 2016, Montreal, April 2016.
2. **Workshop Organizer** UVic Earth System Climate Model Developers Workshop, Victoria, BC, May 2015.
3. **Member**, U.S. CLIVAR Working Group on Ocean Carbon Cycling in CMIP5 Models, June 2009 – 2013.
4. **Member**, U.S. National Academy of Sciences Committee on Stabilization Targets for Atmospheric Greenhouse Gas Concentrations, Washington DC, September 2009 – April 2010.
5. **Participant**, D.O.E. Carbon Cycling and Biosequestration Workshop, Washington DC, March 2008.
6. **Participant**, Climate Engineering Workshop, Harvard University, Boston, October 2007.

d. Media and Public Relations

MEDIA COVERAGE

1. **General Media Activities**
 - Op-Ed published in *The Montreal Gazette*, November 6, 2016.

- “Earth CO₂ levels: Have we crossed a point of no return?” in *Christian Science Monitor* (and other online news), September 29, 2016.
 - Op-Ed published in *The Montreal Gazette*, December 14, 2015.
 - Op-Ed published in *The Montreal Gazette*, October 14, 2015.
 - Feature interview: “Le comptable de l’atmosphère” (the atmospheric accountant), in *La Presse Plus*, December 30, 2013.
 - “‘It’s not too late’ to stop climate spiral, Montreal scientist says,” in *The Montreal Gazette*, September 27, 2013.
 - Op-Ed published in *Le Devoir* and *The Montreal Gazette*, February 20, 2013.
 - Op-Ed published in *Le Devoir* and *The Montreal Gazette*, November 5, 2012.
 - Op-Ed published in *Le Devoir* and *Journal de Montreal*, April 23, 2012.
 - Op-Ed published in *The Montreal Gazette*, July 2, 2011.
 - Op-Ed published in *Le Devoir*, Montreal, December 7, 2009.
 - Live radio call-in show on “Radio Noon”, *CBC Radio Montreal*, December 2009.
 - “Concordia prof gets grant for climate research” In: *The Concordian* (Concordia University Weekly Newspaper), September 2008.
 - “Damon Matthews: Chasing climate change.” In: *Concordia Journal* (Concordia University Weekly Newspaper), January 2007.
2. **Research coverage:** *Climate change impacts on non-human primates* (Graham et al., 2016)
 - *Science Daily* (and other online news), August 2016.
 3. **Research coverage:** *Climate clock website and projection*
 - *Globe and Mail*, *CTV Montreal*, *City TV* (and others), April 2016.
 4. **Research coverage:** *Regional climate response to cumulative CO₂ emissions* (Leduc et al., 2016)
 - *Ici Radio Canada*, *Métro Montréal*, *VICE Canada* (and others), January 2016.
 5. **Research coverage:** *Quantifying historical carbon and climate debts among nations* (Matthews 2016)
 - *New Scientist*, *Inside Climate News*, *VICE Motherboard*, *La Presse* (and other international news), September 2015.
 6. **Research coverage:** *National contributions to historical global warming* (Matthews et al., 2014)
 - *New Scientist*, *Bloomberg Business Week*, *the Huffington Post*, *the U.K. Times* (and other international news), January 2014.
 7. **Research coverage:** *Irreversible does not mean unavoidable* (Matthews and Solomon, 2013)
 - *Climate Central* and *Huffington Post*, March 2013.
 8. **Research coverage:** *Effect of climate change on outdoor skating* (Damyanov et al., 2012)
 - *New York Times*, *The Guardian*, *Le Monde*, *Toronto Star*, *Globe and Mail*, *National Post*, *PBS Newshour*, *Météo Média* (and other national/international news), March 2012.

9. **Research coverage:** *Infrastructural Emissions Commitment* (Davis et al., 2010)
 - *Le Monde, CBC News, Canwest News*, (and other international news), September 2010.
10. **Research coverage:** *Carbon Emissions for 2-Degrees Warming* (Matthews et al., 2009)
 - *Montreal Gazette, Canwest News, CBC Radio, CBC Television, Radio Canada*, (and other national news) June 2009.
11. **Research coverage:** *Climate stabilization requires near-zero emissions* (Matthews and Caldeira, 2008)
 - *The Washington Post* (page A1), *New Scientist Environment, The Montreal Gazette, The Victoria Times Colonist* (and other national/international news), February 2008.
12. **Research coverage:** *Geoengineering* (Matthews and Caldeira, 2007)
 - *Aerospace America, ABC News, Nature Reports Climate Change, New Scientist Environment, ScienceNOW Daily News, Scientific American*, (and other international news), July 2007.

JOURNAL HIGHLIGHTS OF PUBLICATIONS

1. **Environmental Research Web**, September 2015.
 - “Are the December emissions pledges up to scratch?”, highlighting Gignac and Matthews (2015) in *Environmental Research Letters*.
2. **Environmental Research Web**, January 2014.
 - “Climate change: who’s the biggest emitted of them all?”, highlighting Matthews et al. (2014) in *Environmental Research Letters*.
3. **Environmental Research Web**, March 2012.
 - “Warming climate is bad news for Canadian outdoor skating”, highlighting Damyanov et al (2012) in *Environmental Research Letters*.
4. **Environmental Research Web**, October 2009.
 - “Of mongooses and men: why aerosol geoengineering could prove risky”, highlighting Matthews and Turner in *Environmental Research Letters*.
5. **AGU Journal Highlight**, March 2008.
 - “Stabilizing climate requires near-zero emissions”, highlighting Matthews and Caldeira (2008) in *Geophysical Research Letters*.
6. **PNAS Commentary**, June 2007.
 - “Evaluating a technological fix for climate”, by Peter G. Brewer, highlighting Matthews and Caldeira (2007) in *Proceedings of the National Academy of Sciences*.
7. **AGU Journal Highlight**, December 2005.
 - “A decrease of emission is required to stabilize atmospheric CO₂”, highlighting Matthews (2005) in *Geophysical Research Letters*.

e. University and Departmental Service and Committees

1. Chair, Departmental Assessment Committee February 2016 – Present
 - Department of Geography, Planning and Environment, Concordia University
2. Member, Faculty Research Committee September 2015 – Present
 - Faculty of Arts and Science, Concordia University
3. Graduate Program Director (M.Sc. and Ph.D.) June 2016 – December 2016
 - Department of Geography, Planning and Environment, Concordia University
4. Member, Graduate Program Committee June 2016 – December 2016
 - Department of Geography, Planning and Environment, Concordia University
5. Member, Dept. Hiring Committee (Environmental Science) September 2015 – April 2016
 - Department of Geography, Planning and Environment, Concordia University
6. Member, Dept. Hiring Committee (Ecological Economics) June 2015 – December 2016
 - Department of Geography, Planning and Environment, Concordia University
7. Graduate Program Director (M.Sc.) June 2011 – June 2013
 - Department of Geography, Planning and Environment, Concordia University
8. Member, Graduate Program Committee June 2011 – June 2013
 - Department of Geography, Planning and Environment, Concordia University
9. Chair, Ph.D. Proposal Development Committee January 2012 – June 2013
 - Department of Geography, Planning and Environment, Concordia University
10. Member, Ph.D. Proposal Development Committee November 2009 – December 2011
 - Department of Geography, Planning and Environment, Concordia University
11. Member, Departmental Workload Committee December 2008 – April 2010
 - Department of Geography, Planning and Environment, Concordia University
12. Departmental Research Liaison September 2008 – April 2010
 - Department of Geography, Planning and Environment, Concordia University
13. Departmental Seminar Series Coordinator September 2008 – December 2009
 - Department of Geography, Planning and Environment, Concordia University
14. Member, Departmental Hiring Committee (Political Ecology) January 2008 – April 2008
 - Department of Geography, Planning and Environment, Concordia University
15. Member, Department Chair Search Committee January 2008 – April 2008
 - Department of Geography, Planning and Environment, Concordia University
16. Member, Departmental Curriculum Committee September 2008 – August 2009
 - Department of Geography, Planning and Environment, Concordia University

f. Reviewer Contributions

1. Peer-Reviews of Journal Manuscripts

- 1 *Carbon Management* manuscript
- 3 *Climatic Change* manuscripts
- 1 *Climatic Change Letters* manuscript
- 4 *Climate Dynamics* manuscripts
- 21 *Environmental Research Letters* manuscripts
- 1 *EOS* manuscript
- 7 *Geophysical Research Letters* manuscripts
- 1 *Geophysical Model Development* manuscript
- 2 *Global Change Biology* manuscript
- 12 *Journal of Climate* manuscripts
- 10 *Nature* manuscripts
- 15 *Nature Climate Change* manuscripts
- 6 *Nature Geosciences* manuscripts
- 3 *Proceedings of the National Academy of Sciences USA* manuscripts
- 1 *Philosophical Transactions of the Royal Society of London* manuscripts
- 1 *Science* manuscript
- 1 *Water Resources Research* manuscript

2. Other Peer-Reviews

- Textbook proposal review, Oxford University Press, June 2013.
- Intergovernmental Panel on Climate Change Working Group 1: Fifth Assessment Report, Chapters 6, 8 and 12, October 2012.
- Wiley and Sons textbook chapters (3), June 2012.
- Pearson Canada textbook proposal, March 2010.
- NSERC Discovery Grant proposal, January 2010.
- Intergovernmental Panel on Climate Change Working Group 1: Fourth Assessment Report, Chapters 2, 7 and 10, November 2005.

g. Memberships in Professional Societies

1. **Canadian Meteorology and Oceanography Society:** Member, 2008-present.
2. **American Geophysical Union:** Member: 2004-present.
